

# Z-11 Personal Timeline.....

"The history of design, like any history is completely malleable. With no hard start date, we have to make choices. Our history is the history of human communication"  
-Steven Brower

## Mission:

Create a visual timeline. The timeline starts with your birth, moves through your personal milestones, includes concurrent national and/or world events, and ends in an imagined future.

**Develop a strong concept that ties together the visuals.**

Composition must be easy to navigate for the viewer. Use principles and elements (shape/line/color) to organize information and help the viewer move sequentially through time.

## Requirements:

- Includes at least five national and/or world events (climate, social, politics, music, athletic, scientific).
- Include at least one future date and imagine at least one event for you and the world.
- 11 x 17
- Imagery: either self generated or stock images (Thinkstock).
